

Proficio Elements

Proficio Elements is scaled to smaller collections and budgets. Elements is ideal for institutions with up to four distinct collection types and five or fewer users. Like the larger Proficio system, it features intuitive user interface, one-click access to tools, quick searching, images, reporting, and much more.

Proficio Elements by Re:discovery

Directory styles are available for **art, cultural history, natural history, archives, and library**. Learn more about the components and differences between the two systems in the charts below.
